

INTRODUKTION

"Autodata 74" är ett nytt sätt att se på uppläggnings av automobildata. Som kända utgivare av tekniska handböcker har vår erfarenhet visat, att förutom elektronisk finjusteringsdata, finns ett behov av tekniska specifikationer t.ex. hjulinställning och vridmomentvärden. "Autodata 74" uppfyller dessa krav genom att omfatta både elektronisk och teknisk data i samma bok.

I början av handboken finns en förteckning över fordon, vart och ett under sitt märke och beteckning och med hänvisning till relevanta sidor.

Överst på varje sida står respektive tillverkarens namn med stora bokstäver och modellbeteckningar omedelbart under. Data är upplagd i spalter, elektronisk finjustering på framsidan och allmän teknisk data på baksidan. Där så är lämpligt, står alternativt att finna i de angränsande spalterna.

På framsidan ger punkterna 1-6 bestämd identifiering av modell och omfattar år och allmänna motorspecifikationer. De följande punkterna, 7-38 inklusive, sörjer för nödvändig data av elektronisk testning av tändsystemets komponenter, medan de sista punkterna, 39-53 omfattar start- och laddningssystem. Skissen, som är inkluderad längst ner på sidan, visar var tändningsinställningens markeringar är belägna samt lägen av cylindrar och fördelare. I det sistnämnda fallet är nr 1 tändstiftskabel märkt med en svart prick och riktningen av rotorns rotation med en böjd pil. Cylinderblockets riktningsläge är också märkt med en stor pilspets, som pekar mot bilens framdel.

Modellrubriker och årtal är upprepade på baksidan och åtföljs av punkterna 55-75, vilka omfattar allmän teknisk data för motorn och tillhörande komponenter. Fyllningskapacitet av viktigare motor- och växelenheter finns under punkterna 76-82 på listan. De återstående punkterna omfattar däckstorlekar och lyfttryck (83-85), hjulinställning på fram och bakhjul och viktigare vridmoment (96-104). Illustrationerna visar detaljer av justeringsskruvar på förgasaren och ordningsföljden av cylinderhuvudets skruvåtdragningar. I det sistnämnda fallet är framsidan av cylinderhuvudet markerat med en pilspets.

Dessa data har sammanställts av Intereurope Ltd. och är baserade på upplysningar från tillverkare av bilar och bilaccessoarer.

Alla rimliga försiktighetsåtgärder har vidtagits för att tillförsäkra rätt och riktig information i denna handbok. Varken författarna, eller det eller de företag som framställer handboken är dock ansvariga för följderna av felaktig eller förvrängd framställning av upplysning, eller för de fel som oavsiktligt kan ha uppstått under förberedandet av boken.

INTRODUKSJON

"Autodata 74" er en ny måte å presentere automobildata på. Vår erfaring som etablerende utgivere av tekniske håndbøker viser, at der i tillegg til et behov for elektroniske innstillingsdata også finnes et behov for mekaniske spesifikasjoner som f.eks. hjulinstillingsdata og fastspenningsmomenter. "Autodata 74" tilfredstiller disse krav med både elektroniske og mekaniske data samlet på praktisk måte i et enkelt bind.

En indeks foran i boken lister kjøretøyene under merke og modellbetegnelse med tilhørende sidehenvisning.

Øverst på hver side finnes den respektive fabrikkens navn i store bokstaver, med modellbetegnelse rett under. Data finnes anført i kolonner, elektroniske data på forsiden og generelle mekaniske data på baksiden. I vedkommende tilfelle anføres alternativer eller valgfrie deler i kolonnen ved siden av.

På første side, viser punkter 1-6 positiv modellidentifikasjon med årrekke og alminnelig motor spesifikasjoner. Følgende punkter 7-38 inklusive viser de nødvendige data for elektronisk undersøkelse av tenningsystemets komponenter, mens de øvrige punkter 39-53 dekker starte og laddningssystemet. Tegningene nederst på siden illustrerer tennings taktinnstillingsmerker og sylinders nummerering samt strømfordeler posisjonene. I sistnevnte tilfelle identifiseres tennplugg Nr. 1 med en sort flekk, og rotorens omdreiningens retning med en krummet pil. Sylindrerblokkens orientering anvises likeledes med en større pilspiss som peker mot forsiden av bilen.

Modelloverskriftene og datoer gjentas på bladets bakside og etterfølges av punkter 55-75 som dekker motorens alminnelige mekaniske spesifikasjoner med tilhørende komponenter. Påfyllningskapasiteter for de viktigste motor og transmisjonsenheter finnes anført under punkter 76-82. De øvrige punkter dekker dekkstørrelse og oppblussingstrykk (83-85), for og bakhjulsinnstillinger (86-95) samt de viktigste fastspenningsmomenter (96-104). Illustrasjonene viser detaljer angående karboratorers justerings skruer samt fastspenningssekvens for toppstykkers bolter eller møtrikker. I siste tilfelle vises toppstykkets forside igjen med en pil.

Hvor der mangler data, kan det bety at punktet ikke vedkommer saken eller at data ikke sto til rådighet på tidspunktet ved utgivelsen.

De forskjellige data er utarbeidet av Intereuropa Ltd. på basis av opplysninger stillet til rådighet av bil og tilbehørsfabrikker.

Der er tatt alle rimelige forholdsregler for å sikre nøyaktigheten av opplysninger i denne håndbok, men hverken forfattere, selskapet eller selskapene som leverer denne håndbok kan ta ansvaret for følgene av ukorrekt eller forvanskete opplysninger eller feil som ved uhell skulle være oppstått under dens forberedelse.

Ignition voltage at load	Kv	12 10-14	8-12	8-12	12
IGNITION DISTRIBUTOR	Make	13 Bosch	Bosch	Bosch	13
	Type	14 022 905 205/205B	0 231 174 009	0 231 174 009	14
Dwell angle	Degrees	15 44-50	44-50	44-50	15
Contact breaker gap	mm (in)	16 0,4 (0.015)	0,4 (0.016)	0,4 (0.016)	16
Condenser capacity	mfd	17	0,15-0,20	0,15-0,20	17
Firing order		18 1-4-3-2	1-4-3-2	1-4-3-2	18
IGNITION TIMING		19			19
Basic setting static	Degrees BTDC	20 5	5	5	20
Stroboscopic at cranking	Degrees BTDC	21			21
Stroboscopic	Degrees BTDC/rpm	22 27/3500	27/3500	27/3500	22
CENTRIFUGAL ADVANCE	Without vacuum	23			23
Starts	C/S Degrees/rpm	24 1000/1200 1000/1200	900-1000	900-1000	24
Intermediate 1	C/S Degrees/rpm	25 9-12/1500 14-17/1500			25
Intermediate 2	C/S Degrees/rpm	26 15-18/2200 14-17/2100	6-10/1500	6-10/1500	26
Ends	C/S Degrees/rpm	27 22-25/2900 22-25/2900	20-24/3000	20-24/3000	27
VACUUM ADVANCE		28			28
Range	C/S Degrees	29 12-15	6-8	6-8	29
Starts	mm (in)/Hg	30 100-130 (3.9-5.1)	100-130 (3.9-5.1)	100-130 (3.9-5.1)	30
Ends	mm (in)/Hg	31 190 (7.4)	145-165 (5.7-6.4)	145-165 (5.7-6.4)	31
VACUUM RETARD		32			32
Range	C/S Degrees	33 8-10	8-12	8-12	33
Starts	mm (in)/Hg	34 60-100 (2.3-3.9)	60-100 (2.3-3.9)	60-100 (2.3-3.9)	34
Ends	mm (in)/Hg	35 150 (5.9)	148-158 (5.8-6.2)	148-158 (5.8-6.2)	35
SPARK PLUGS	Make	36 Bosch	Bosch	Bosch	36
	Type	37 W175T2	W175T2	W175T2	37
Gap	mm (in)	38 0,7 (0.027)	0,7 (0.027)	0,7 (0.027)	38
BATTERY	Voltage/Capacity/Polarity	39 12/45/Neg.	12/45/Neg.	12/45/Neg.	39
STARTER MOTOR	Make	40 Bosch	Bosch	Bosch	40
	Type	41 EF (L) 12V-0,7 PS	EF (L) 12V-0,7 PS	EF (L) 12V-0,7 PS	41
Starting voltage	Volts	42 9	9	9	42
Lockdraw	Amps/Volts	43 250-350/6	250-350/6	250-350/6	43
GENERATOR	Make	44 Bosch	Bosch	Bosch	44
	Type	45 K1 (RL) 14V 55A 22	K1 (RL) 14V 55A 22	K1 (R) 14V 55A 22	45
Output	A/V/rpm - gen.	46 50/14/6000	50/14/6000	55/14/6000	46
REGULATOR	Make	47 Bosch	Bosch	Bosch	47
	Type	48 0 190 600 011	0 190 601 006	0 190 601 006	48
Open circuit voltage	Volts	49			49
Cut-in voltage	Volts	50			50
Drop off voltage	Volts	51			51
Reverse current	Amps	52			52
Regulator voltage - Alternator	Volts	53 13,9-14,8	13,9-14,8	13,9-14,8	53
